Help the cat to reach the milk bowl by coloring the rectangles.

A maze puzzle where the goal is to help a cat reach a milk bowl by coloring the correct path. The path is composed of rectangles. The maze starts at the top left with a vertical rectangle, followed by a horizontal rectangle, then another horizontal rectangle. Below these are an oval, a circle, a triangle, and a star. To the right is the cat. Below the cat are a star, a circle, a pentagon, a circle, and an oval. Below these are a large vertical rectangle, a horizontal rectangle, a square, and another horizontal rectangle. Below these are a vertical rectangle, a hexagon, a star, a pentagon, an oval, and another vertical rectangle. Below these are an oval, an inverted triangle, a circle, a hexagon, and another vertical rectangle. Below these are two ovals, a circle, and another oval. At the bottom left is a green milk bowl. At the bottom right is a vertical rectangle. At the bottom center are two horizontal rectangles.

Help the cat to reach the milk bowl by coloring the rectangles.

A maze puzzle where the goal is to help a cat reach a milk bowl by coloring yellow rectangles. The path is defined by the following sequence of shapes:

- Top row: Three yellow rectangles.
- Second row: An oval, a circle, a triangle, and a star.
- Third row: A star, a circle, a pentagon, a circle, and a vertical oval.
- Fourth row: A tall yellow rectangle on the left, a yellow rectangle, a yellow square, and a yellow rectangle on the right.
- Fifth row: A yellow rectangle on the left, a hexagon, a star, a pentagon, an oval, and a yellow rectangle on the right.
- Sixth row: An oval, an inverted triangle, a circle, and a hexagon.
- Seventh row: An oval, a circle, and an oval.
- Eighth row: A green milk bowl on the left, a yellow rectangle, a yellow square, and a tall yellow rectangle on the right.
